overhang to allow the grill face to sit flush with the front wall.

OUTDOOR KITCHEN CONSIDERATIONS

- · Carefully consider grill size & accessories needed
- · Combustible construction requires insulating liner
- Select Natural or Propane (LP gas)
- Determine total gas consumption for supply line size
- Access is required to gas connections and shut off valve
- Plan location of propane tank away from grill and appliances
- Always refer to the installation and operating instructions of your Fire Magic® grill and/or accessories for installation guidelines & safety warnings before starting your project
- Always check all gas connections for leaks
- Provide ventilation in island for gas vapors. Allow at least four ventilation openings (two at floor level and two 16" above floor 10 in² each) at opposing ends/sides

LOCATION

- Identify outdoor area where grill will be installed
- Determine the utilities needed (gas, water, electricity, drainage etc.)
- Consider element exposure (sun, wind direction*, weather etc.) * Wind blowing into or across the rear oven lid vent can cause poor performance and/or dangerous overheating. Orient the grill so that the prevailing wind blows toward the front of the grill.

MATERIALS

- Foundation concrete
- Base- brick, stone, stucco, concrete
- Counter top- tile, granite, marble, concrete

<u>Notes</u>

- 1. There is a hanger on three sides of each grill. You must allow clearance for the hanger (SEE DETAIL 1).
- 2. The control panel (face) of the grills is wider than the cutout width. This conceals the cutout space on the left & right hand sides.
- 3. Clearance of 10" on each side of the oven is recommended for unrestricted operation of lid and rotisserie and at least 3" at the rear flange for ease of maintenance and proper operation. (18" from combustible surroundings on each side and rear is required)
- 4. Insulating liners must be used & are available for combustible surrounds (See page 6).
- 5. The rotisserie motor on all models is located on the right side of the grill. Optional Reverse Brackets are available to mount rotisserie motor on opposite side. ONLY units ordered with back burner option come with rotisserie kit and brackets.

FIREMAGIC COUNTERTOP GRILLS, ACCESSORIES, DOORS & DRAWERS

Notes

- 1. There is a hanger on three sides of the grill (SEE DETAIL 3).
- 2. The control panel (face) of the accessories is wider than the cutout width, this conceals the cutout space on the left & right hand sides.
- 3. Clearance of 10" on each side, and 3" at the rear of the oven is recommended for unrestricted operation of accessories. (18' from combustible surroundings on each side and rear)
- 4. Insulating liners must be used and are available for combustible surrounds. Double Side burner (3281), Single Side burner (3279-1) and Drop-In Side burner (3280) do not require an insulating liner (See page 6).

Frame Outline \rightarrow \leftarrow DETAIL 4

Door/Drawer

Door frame varies in width (1"-2" ALL AROUND) depending on the size & configuration of the door & drawer

INSULATING LINER MUST BE USED WHEN INSTALLING IN A COMBUSTIBLE ISLAND Not used on Double Sideburner (3281), Single Sideburner (3279-1) or Drop-In Sideburner (3280)

Choose front or back knock-outs for gas and electrical connections
